To,
The Visa Officer
Canadian High Commission
New Delhi, India

Subject: Application to study permit for Diploma in Computer System Technician.

Respected Sir/Madam,

Growing up, I remember, every time when our English teacher used to give us the assignment of writing essays on 'Aim in Life.' I have to admit that, my aim in life use too change in every grades. But it wasn't so until I arrived in grade 8th, where for the first time, I got to learn some different subjects. The computer was one of the subjects that completely captivated me. In my school, only students above grade eight were allowed to enter computer labs, which gave me tons of happiness. As time changed, I never had the assignment to write the essay on Aim in Life, ever again. Nevertheless, I found the real aim in my life. I requested my parents to get a new computer for me, which further motivated me to study better. Initially, I use to play games and draw some paints, but later when I got much more mature, I started fixing all kinds of issues like installing operating systems, configuring wireless networks, creating security layers, installing rams, changing CPU motherboards, and creating a web page using HTML and CSS. With passion and zeal to make my career in the field of technology, I have researched the opportunities and scope as a Computer System Technician in Nepal. And with the world constantly turning digital, and the internet becoming a 6th basic need of our life, there will never be fear of job insecurity for IT professionals. Namaste, my name is **Thomas KC**, born on 1st July 2003, a permanent resident of Sukkhanagar-08, Butwal, Nepal. Here I am presenting to you my motivation and purpose so that you allow me access to study a diploma course in **Computer System Technician** at **Mohawk Canada**.

Academic Background:

I've always loved learning new things in life. Interest, curiosity, hard work, and confidence have rewarded me with a **3.1 GPA** in Secondary Education Examination (namely SEE) from Everest English Boarding Secondary School in **2019 AD**. Ever since I was a child, I have always been fascinated by computers because I grew up playing games and surfing the internet on my computer. I also loved to watch different television shows on YouTube, including science, technology, wildlife, nature, and survival shows. Having an interest in science and technology, I chose to study science in high school which had computer science, mathematics, and Nepali as the core subjects. Finally, I was able to graduate high school from Everest English Boarding Secondary School with a **GPA of 3.43** in the year **2021**. After my completion of my high school, I decided to pursue my further education in abroad. So, I decided to take language classes further after. I appeared **IELTS examination** on **5th February, 2022** where I was able to get an overall band score of **6.5 (Listening: 7.0, Reading: 6.5, Writing: 6.0 and Speaking: 6.0)**

My story

Going back to grade eight it was the first time when I met with computers. Earlier than that, our school didn't allow us to enter the computer lab, nor did my parents gift me. It's obvious that things should be given to the kids only after they are educated about it. However, during my school days, I learned the basic components and the functions of computers and some of the basic programming languages like QBasic and c+. My curiosity and longing for computers and technology didn't stop there, because after having a computer with an internet connection at home, I often use to face troubles and issues, sometimes, the computer won't turn on, sometimes the internet wouldn't work, operating system or other software is either unresponsive or is acting up, sometimes the computer is slower than normal, sometimes it's an overheating issue, sometimes virus attacks and endless other problems. Tackling and trying to solve all these problems, I learned so many things about, hardware, software, operating systems, and the internet. And when I joined high school, I got to learn much about different

programming languages such as HTML, CSS, and Java Scripts and designing simple web pages, structuring data, and much more. All of these were constantly adding up to my inspiration, motivation, and curiosity, I was amazed by the capabilities of a computer and the internet. Finally, for our 12th-grade project, our teacher gave us the assignment to go to the IT companies and document their product and services, and the daily operations involved; we were all excited because it was the very first time, visiting such companies. My team choose, Cloudfhub365, an internet service provider, and a software consulting company, located near my hometown, it took 3 visits to complete our project but, the experience left me amazed, I really liked the ambiance there, things were buzzing, and everyone had their responsibility, some of them were providing customer support, some were developing business applications, some were fixing clients problems, some were in the field service with a team. It was the point for me because I started thinking about my career and decided to work in a similar kind of environment. All of these series of incidents made me really impatient to further my studies in technical subjects. Without much research and consideration, I immediately applied for a student visa in **Australia** to pursue a Diploma in IT leading to Advanced Diploma in IT, and on **8th July 2022**, I got refused for not being able to convince them of my motivation. It was a moment of truth for me, cause, it made me realize that I have to reconsider my choice and also do more research before applying for any courses. However, I admitted my shortcomings and this time with much awareness and consciousness, I have chosen to study a course in Computer systems and Networking.

Reasons for choosing Computer System Technician and Networking?

The simple reason for me to study computer systems and networking is because, both of these are an inseparable part, every business, service, organization, and an individual house requires a computer system and obviously network services. any kind of a co-operate or a large business enterprise requires numbers of computers and different kinds of connection setup, as a computer system and network technician, I can identify, analyze, develop, implement, verify and document the requirements for a computing environment, implement robust computing system solutions through validation testing that aligns with industry best practices, fix and troubleshoot network issues, design networks for huge buildings and office spaces and much more. Studying computer systems and network technician I would be aligning my school days passion with the real world, and I believe doing what I love would make me much happier and more satisfied than anything else. Regarding the scope and opportunity, if we Google the hottest job on the planet, its technical job, or the IT professionals and Nepal being on the verge of development, I can see a lot of IT companies, co-operates, companies, offices, and all kinds of businesses being established, all of them need a computer system and a Network technician for sure. The job market for computer system technicians is expected to grow by **11 percent** from **2018 to 2028**, according to the U.S. Bureau of Labor Statistics. This is fantastic growth, and as the world becomes increasingly reliant on technology, the demand for qualified computer system technicians will continue to rise.

Reasons for not studying in Nepal.

I love my country Nepal, but unfortunately, I am not a great admirer of the education system of Nepal, I have always heard from my seniors stating the education system in Nepal is outdated, not practical enough, and studying 4 years of a bachelor's degree would not even have the capability to land you a job, and endless complains. However, I did my own research, I started looking for colleges and courses offering Computer system Technicians specializing in Networking. I was almost certain that it would be hard for me to find such an industry-specific course, but still, I kept on doing my research, finally, I found a small diploma course, in the computer system, and being excited, I went through the curriculum, I was completely shattered by looking at the curriculum, those subjects were completely irrelevant and later I found the institution offering the course is not registered and also non-regulated. After much research and consideration, I finally realized that studying abroad will not only enable me with a high-quality education but will also develop some soft skills such as English communication, critical thinking, self-awareness, and much more. In fact, foreign graduates are highly valued by companies and employers here in Nepal. Finally, with all of these supporting reasons, I decided not to study in Nepal.

Reasons for choosing Canada.

Earlier it was my immaturity, not considering these two countries USA and Canada, which are the pioneers in terms of **Information technology and technical studies**. When I actually did my research considering every minute detail, I found these two countries as the best place to study technical subjects. However, I had to choose only one, so this time I made a comparative analysis between these two, considering the various factors like choices of colleges, living expenses, affordable colleges, safety and security, and many more other factors. Finally, I decided on Canada, for my further studies, the reasons were quite simple, Canadian colleges were pioneers in diploma and vocational based courses while the USA had mostly universities with 4 years of a bachelor's degree, Canada college tuition fees, living expenses were much affordable in comparison to the USA and the final and most important reason that during my research I found Canadian college is much safer, people are much welcoming and there is almost no gun violence while comparing to the USA in this topic, I found America to be not so great place to be and study.

Reasons for choosing Mohawk College.

Canada is the king of vocational training colleges, there were so many different choices of colleges all of them offering distinctive courses, facilities, and methodology. However, I again shortlist some of the most popular colleges that have the course that I wanted to study, some of them were, **Seneca College, Centennial College, and Fanshawe College**. In comparison, I chose Mohawk because it is one of the highly ranked colleges in the whole of Ontario, I really love the practical learning module and Mohawk college also claims that they are the leading college for **experiential learning, with stimulus labs, field trips, industry visit, lots of projects works**, Mohawk really focuses on building students' career as efficient as possible so that student will experience a smooth career transition. Talking about the course offered by Mohawk, this program is designed to give students the skills and knowledge they need to start an exciting career in information technology. This course offers the skill needed to create and configure virtual machines, design databases, and networks, administer Microsoft and Linux systems, and deploy operating systems. These are all highly demanded skills that will help me in my career. Mohawk College is not only one of the top colleges in Ontario, but it is also a preferred choice for international students. I am confident that its academic reputation and diverse student community will help me to succeed and graduate as a skilled and well-qualified technician.

Future Career Plans:

It is well-known fact that the youth of the country is a great asset and future for development. The only reason for me to go to Canada is to receive international-level education and gain exposure in the field of information technology so that I can contribute back to my country and intern make a very successful and lucrative career in Nepal. I am certain that this opportunity to study in Canada will hone me with all the needed knowledge and skill to become a professional computer system and Network specialist. Currently, Nepal is progressing leaps and bounds in the business, banking, information technology, and financial sector which has opened enormous doors of opportunities for future IT graduates like me. Having an international degree will surely increase my chances to get a decent job with a very competitive salary in comparison to an average Nepalese graduate. I am planning to work at some of these national and multinational companies which are in Nepal such as Verisk Nepal (<https://verisknepal.com.np>), F1Soft (<https://f1soft.com>), CloudFactory (<https://cloudfactory.com.np>), Cotiviti Nepal (formerly known as Versand Technologies Pvt. Ltd.) (<https://cotiviti.com.np>), Braindigit (<https://braindigit.com>), Fuse Machines (<https://fusemachines.com>), Yomari (<https://yco.com.np>), World link Communications (<https://worldlink.com.np>) Working as a Network technician, Network technical support specialist, and Computer systems consultant depending upon the industry, I will be getting a pretty handsome remuneration for my life.

As my long-term plans, I am planning to establish my own computer system and network service providing company, my company will be managing the computer system and Networking system of an entire company, building, offices, banks, hospitals, and many other industries. As our country is marching forward in terms of

industrialization, and many other infrastructural developments, the demands for companies that can give complete technological solution are going to be skyrocketed. Somewhere in me, I have a spirit of entrepreneurship, I am willing to do business related to Information technology, and I believe it's all about gathering the team, having an idea, and executing them. Nepal is just a starter in terms of technological development; the sky is only the limit for the IT industry and professionals. And having a Canadian degree, I can gain much trust from the people here in Nepal, which is a massive advantage for my endeavors.

I always believe in doing hard work, but I also understand that hard work alone won't bring success, so I am very much optimistic that this course that I am planning to study will open up a lot of opportunities for me and set me on the right path to success.

Incentives to return back

I understand studying abroad comes with a decent amount of expenses, and I am very much aware that, I need to be much more serious and have legit plans after my graduation, which I definitely have. I have already mentioned the reason for me to study in Canada, which is the pursuit of quality education and global exposure. Being a student of the 21st century I think is very important for us to have a larger perspective and I believe education is all about opening up the perspective. I feel very fortunate and privileged for having this opportunity to study in Canada, and bring back those skills and vision, and finally execute them for my benefit. Moreover, my parents have very good financial standings, I don't have any obligations to stay back in Canada and work for money. By studying IT, I don't have to worry about remuneration and the place where I am, because if I want, I could also be freelancing and traveling the world. But I choose to be with my parents, relatives, friends, my culture, and my beautiful country. I assure you, I will immediately return back after my study completes. Honestly, in our country, parents and their children do not stay separate. I believe internal satisfaction is the greatest achievement for any individual rather than physical contemporary gratification. I don't think I would be happy in my entire life without my relatives and birthplace. I even can't imagine living my life alone, ditching my country and the people around me. So, I will definitely return back to my country to share my dreams with my family, friend, and society as a whole

Financials

I am grateful to my parents that they have never ever compromised on my studies, they always wanted the best for me, and this time again they are willing to cover all of my expenses. My father is an entrepreneur, engaged in the business sector of selling construction items like **sand, gravel, cement, tiles and marbles, and many more**. He owns a business named **"Rambha Devi Suppliers Pvt. Ltd"**. My mother has been working as a **Coordinator (+2 Level Science Faculty)** in a reputed school **"Everest English Boarding Secondary School"**. My mother has also given her land (**plot no. 2164 and 2193**) on lease from which she earns a huge profit every year. Besides, my father and mother have also invested some sum of money in **two** of the most reputed **cooperatives named as "Sahbhagi Saving and Credit Co-operative Ltd." and "Shuva Milan Saving and Credit Co-operative Ltd." respectively**. Furthermore, my grandfather has also given his land (**plot no. 2907**) on lease from which he is also able to earn a handsome income to sponsor my studies in Canada. All of their income combined are able to make an annual income of **CAD \$ 46252.34**. And to further ensure that I don't have to work for my expenses while in Canada, they have managed a bank balance of **CAD \$73937.02 (Dad: CAD \$46241.56 and Mom: \$27695.46)**.

Conclusion:

I want to inform you that my sponsors have committed to providing me with financial assistance throughout my study term and that I will not have any financial difficulties. Along with this SOP, I have included the certified paperwork pertaining to my financial arrangement and sponsorship. I promise that I will not encourage myself to engage in any dubious activities that are in violation of the visa requirements and that I will abide by the terms and conditions, carefully adhering to the Canadian government's rules and regulations. I hereby submit the visa

application along with all the obligatory documents. I greatly anticipate that my application will be reciprocated with positive feedback. Thank you for finding time to go through my statement of purpose.

I look forward to hearing your positive response.

Sincerely Yours,

THOMAS KC

TO WHOM IT MAY CONCERN

It is my pleasure to recommend that **Mr. Thomas K.C.**, Son of **Mr. Surya Bahadur K.C.**, an inhabitant of **Butwal-8, Rupandehi, Nepal**, was a regular student in this institution from 2076 B.S. to 2078 B.S. in Science stream in +2 Level.

Being a student of an English Medium, he will not have any problem in understanding any course of training within or outside the country where English is the medium of instruction. His desire and interest to do something, his interacting and expressiveness, his sense of humor and social behavior have always been good. During his study in the school, I found him very impatient, curious, fond and ambitious. He is always enthusiastic to complete everything for which he is appointed. He frequently gets eager and passion at about every new dealing. So, I'm sure **Mr. Thomas** will have a mellifluous voice where ever he gets enrolled.

According to our school record, his date of birth is 2060-03-17 B.S
(2003-07-01.)

I wish all the best for his future endeavors.

K. Neupane

To Whom It May Concern

It is with great pleasure that I write this letter of recommendation for the truly exceptional **Mr. Thomas K.C**. It is rare to meet a student with as much compassion and self awareness as **Mr. Thomas**. His resilience, positivity, and humor are especially astounding given the challenges he has overcome in his life. Born in a country side and later brought to urban area, he has got plenty of life experiences from both places. Given the depth of his experiences and his sophisticated understanding of lifestyles of various groups of people, **Mr. Thomas** has an unusual maturity beyond 20 years.

The experiences that **Mr. Thomas**, has gathered is really outstanding be it from the activities or his understanding of the different situations. His resilience and optimism have served him well as he has moved between cities and countries, and they will continue to serve him well in college and his future life. **Mr. Thomas**, has my highest recommendation. I know that he will continually impress you with his involvement in college activities, his unshakeable resilience, and his focus on his academic and career success. I am excited to see how far his focus on his academic and career success. I am excited to see how far his educational and professional journey will take him in the future.
